## Skills

|                                |                                                                                                       |
|--------------------------------|-------------------------------------------------------------------------------------------------------|
| <b>Languages</b>               | TypeScript, JavaScript, Python, Go, C++, Swift, Dart                                                  |
| <b>Frontend</b>                | React, Next.js, Vue.js, Tailwind, Angular, HTML, CSS, SwiftUI, UIKit, Flutter                         |
| <b>Backend</b>                 | FastAPI, Python, REST APIs, SQLAlchemy, Node.js, Fastify, Express, Vapor                              |
| <b>Mobile</b>                  | SwiftUI, UIKit, Flutter, BLE communication, SPM, CocoaPods                                            |
| <b>Databases</b>               | OpenSearch, PostgreSQL, MongoDB, MySQL, SQLite, Realm Swift                                           |
| <b>AI / Retrieval</b>          | RAG, LangChain, OpenSearch, semantic search, LLM agents, LangGraph, tool-calling, Haystack, Google AI |
| <b>DevOps / Infrastructure</b> | Docker, GitHub Actions, AWS, Terraform, GitHub, Azure, Firebase, Jenkins, Buildkite, fastlane         |
| <b>Spoken Languages</b>        | German: C2, English: C2, Portuguese: C1, Spanish: B1                                                  |

## Experience

### GovRadar GmbH

FULL STACK DEVELOPER

Munich, Germany

September 2024 - Present

- Built backend REST APIs and data models for public procurement analysis (Python, FastAPI, SQLAlchemy, PostgreSQL)
- Built agentic AI workflows for public procurement analysis (Python, LangGraph, LangChain, OpenSearch, Azure OpenAI)
- Developed TypeScript frontend interfaces for interacting with the internal AI agents (Vue.js, Tailwind, TypeScript)
- Automated Docker-based CI/CD workflows for reliable application delivery (GitHub Actions, Docker)
- Automated testing and deployment workflows for the frontend (GitHub Actions, Cypress, Playwright, Azure DevOps)

### Nextaim GmbH

SOFTWARE DEVELOPER

Munich, Germany

July 2023 - August 2024

- Developed a white-label RAG-enabled AI agent with semantic retrieval (Python, LangChain, OpenSearch, Haystack, React.js, Next.js, Terraform)
- Migrated an enterprise backend from Go microservices to a Node.js layered architecture (Go, AWS, TypeScript, Node.js, Fastify, PostgreSQL, Docker)
- Extended production backend APIs and workflows through continuous feature development (TypeScript, Node.js)

### Fireflow Accelerating Technology Ventures GmbH

IOS APP DEVELOPER

Munich, Germany

May 2021 - May 2023

- Elicited requirements, specified systems and designed new features (Figma)
- Developed the Meiller MiDrive iOS app (Swift, SwiftUI, UIKit, SPM, CocoaPods, Xcode, BLE communication)
- Implemented CI workflows for iOS delivery (Jenkins, Buildkite, fastlane, Firebase, App Store Connect)

## Fondsconsult Research AG

MACHINE LEARNING ENGINEER

*Munich, Germany*

*May 2019 - May 2020*

- Researched and implemented algorithms for predicting investment fund performance from financial datasets (Python, TensorFlow, Keras, SciPy, Jupyter, Morningstar Direct)
- Assisted with the publications “Robo-Advisor-Studie” and “VV-Studie” (MS Office, Morningstar Direct)

## Getnow New GmbH

TECHNICAL ASSISTANT

*Munich, Germany*

*Jun. 2018 - Oct. 2018*

- Developed automated data analysis tools for the product and services department (Python, SciPy, Keras, TensorFlow)
- Performed web scraping and data analysis tasks for the marketing department (Python)
- Maintained databases (MySQL)

## Projects

---

### Loco Lokal GbR

IT MODERNIZATION AND AUTOMATION OF BUSINESS PROCESSES

*Jan. 2026 - present*

- Agency for IT modernization and automation of business processes focusing on small and medium-sized businesses
- Offered services: Website modernization, Infrastructure modernization, IT automation

### Ikon Fisher

NO-CODE FACTOR INVESTING STRATEGY BUILDER

*Dec. 2023 - Dec. 2025*

- Built a platform for creating and backtesting factor investing strategies without code
- Implemented financial data workflows and backtesting APIs for interactive strategy analysis
- Implemented the application with Angular, Tailwind, TypeScript, Python, FastAPI, PostgreSQL and Docker

### Street Treasures

MOBILE APP FOR CURBSIDE GIVEAWAY GOODS

*Mar. 2026 - present*

- Built and promoting a mobile app for allowing people to share and discover curbside giveaway goods
- Technologies used: Flutter, PostgreSQL, Python, FastAPI

### Prisma Identity

CREATION AND SHARING OF VERIFIABLE CREDENTIALS

*Sept. 2022 - Mar. 2023*

- Built a platform for creating and sharing verifiable credentials
- Developed a Flutter-based mobile application (Flutter, Dart, Node, MongoDB)

## Education

---

### TUM (Technical University Munich)

BACHELOR IN INFORMATION SYSTEMS

*Munich, Germany*

*Apr. 2020 - Sept. 2023*

- Thesis on blockchain-based handling of personally identifiable information (Eosio, Quorum, Go, Node, TypeScript, Angular, Vapor, MySQL, MongoDB, Docker)
- iOS internship at Bosch (Swift, SwiftUI, UIKit, CocoaPods, Xcode, OAuth, Postman, BLE communication, Jira, Confluence)

### TUM (Technical University Munich)

BACHELOR IN TECHNOLOGY AND MANAGEMENT

*Munich, Germany*

*Oct. 2017 - Mar. 2020*

**LSH-Ising**

GENERAL QUALIFICATION FOR UNIVERSITY ENTRANCE

*Chieming, Germany*

*Aug. 2013 - Jul. 2015*

- Theater group, Big Band, Rowing club
